DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 17-19, and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Sharood et al.

As per claim 1, Sharood et al. discloses transmitting energy consumption (column 9, lines 26-41; column 20, lines 40-52), maintenance indicator (column 27, 59-65), and food condition (monitored temperature related to food spoilage; abstract, lines 1-5) data from a refrigerator 2600 to a management system (monitoring service; abstract, line 6); and analyzing/monitoring/diagnosing/prognosing the data at the management center (column 1, lines 34-37 and 63-67, column 4, lines 34-39; etc).

As per claims 2, 17, and 22, Sharood et al. further teaches altering the refrigerator system configuration/outputting a work order/advising manipulation (all inherent in calling and sending a repair person – abstract, line 6).

As per claims 18 and 19, Sharood et al. teaches post processing/communication gateway 105 (column 4, lines 1-10).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 8-16 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sharood et al. (U.S. Patent 6,453,687 B2).

As per claims 8-16, while Sharood et al. does not specifically teach monitoring each of the recited variables, official notice is taken that these are all well-known issues related to refrigerator performance that would have been obvious to one of ordinary skill in the art at the time of the invention to monitor as part of a refrigeration management system such as that of Sharood et al.

As per claim 23, Sharood does not specifically state that the refrigeration system is located at a retail location. However, refrigeration systems are common in retail locations, and it would therefore have been obvious to one of ordinary skill in the art at the time of the invention

Art Unit: 3744

to apply the refrigeration monitoring system of Sharood et al. within a retail environment, this being simply a particular application of the basic invention.

Allowable Subject Matter

Claims 3-7, 20, and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc E. Norman whose telephone number is 703-305-2711. The examiner can normally be reached on Mon.-Fri., 8:00-5:30, with first Fridays off.
